

Widening Program Road & Construction Advisory

(Widening local road & NJ Turnpike lane or roadway closures that may impact traffic)
Visit 511nj.com for live, up-to-the-minute traffic information

ON SCHEDULE AND MORE THAN \$200 MILLION UNDER BUDGET, the Interchange 6 to 9 Widening Program between Interchange 6 in Burlington County and Interchange 9 in Middlesex County is nearly complete. Northbound lanes opened Monday, October 27, 2014. Southbound lanes opened Monday, November 3, 2014. The Widening doubles capacity on a chronically congested 35-mile stretch of the roadway, adding three lanes in each direction between Interchanges 6 and 8A and one lane in each direction between 8A and 9.

At the peak of construction, the Widening Program was the largest ongoing roadway project in the Western Hemisphere. During this time period, 1,000 workers were employed on the Widening every day. A milestone was reached the weekend of May 17-18, 2014 when the newly constructed lanes in each direction opened to traffic for the first time, and the inner lanes closed down for reconstruction work for approximately six months. During construction, 140,000 cubic yards of concrete, 2.4 million tons of asphalt, 123 miles of guardrail, four miles of noise barriers, 17 miles of relocated pipeline, and 140 new over-the-road signs were used. More than 120,000 new trees were planted in the Turnpike right of way or on public lands in towns along the Widening corridor (about 91,000 trees were removed during construction). There were 17 general contractors, 327 subcontractors, five construction management firms and 21 utility companies involved in construction. Please continue to check this website for NJ Turnpike Int. 6 to 9 Widening information.
